The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Acknowledgment is made of the amendment filed on 7/25/05. Claims 1-24 are currently pending.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 3. Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Akiyama et al (US 4,680,785) (hereinafter referred to as 'Akiyama') in view of John (US 5,179,373).

Akiyama teaches a radio unit comprising:

a first removable user identification card, wherein said first card includes a memory

Application/Control Number: 10/730,229

Art Unit: 2876

that stores first subscriber identification information (portable identification device 4);

a card interface (card reader 5);

a transmitter that transmits said first personal access number to a wireless communication device, wherein the first personal access number is produced from said first user identification information (col. 6, lines 21-28);

the phone wherein the transmission of said first personal access number to said wireless communication system enables said radio unit to receive calls associated with said first user information (col. 3, lines 1-15);

the phone wherein said first user identification information includes a subscriber account number;

the phone wherein said transmitter is a spread spectrum transmitter (col. 3, lines 65-68); the radio unit wherein said wireless information system is a radio system (col. 4, lines 7-

9)

Akiyama lacks the teaching of a card having a microprocessor.

John teaches a card having a microprocessor (col. 5, lines 44-47).

One of ordinary skill in the art would have readily recognized that providing the Akiyama invention with a card having a microprocessor would have been beneficial for making the card multi-functioning and able to store large amounts of data. Therefore, it would have been obvious, at the time the invention was made, to modify the teachings of Akiyama with the aforementioned teaching of John to increase the flexibility of the user when using the phone.

Akiyama/John lack the specific teaching a second removable user identification.

Application/Control Number: 10/730,229

Art Unit: 2876

However, a duplicate of an element of a system or method would have been an obvious modification to the system or method for increasing the dexterity of the system or method allowing it be more efficient. Furthermore, no patentable significance is given unless a new and unexpected result is produced. Therefore, it would have been obvious, at the time the invention was made, to modify the teachings of Akiyama/John.

Response to Arguments

4. Applicant's arguments regarding the filing date of the Le invention with respect to the rejection(s) of claim(s) 1-22 under 35 U.S.C. 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Akiyama in view of John

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jamara A. Franklin whose telephone number is (571) 272-2389. The examiner can normally be reached on Monday through Friday 8:00am to 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached on (571) 272-2398. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
